## Description

Incubation center is the institution that assists entrepreneurs in developing their business and solving problems associated with it, especially in the initial stages, by providing an array of business and technical services, initial seed funds, lab facilities, advisory, network and linkages. Entrepreneurship in India is on the verge of explosive growth. This also throws new opportunities for the eco-system to take shape. Angel investors, venture capital, media, start-up clubs, service providers, mentors and training companies are going to grow. And one important cog in the wheel is the incubation the place where start-ups are born. When a baby is born, he/she is kept in the incubation for the first few hours and maybe days – this gives them a chance to adjust to the outside environment, and grow stronger before they face the outside world! In a similar way, a start-up is incubated in Incubation Centre, which gives them a chance to bring their business in shape, before they reach out to the world.

Incubation center of this institute have developed the sub centers at 5 departments provides commercial training program as per following.

1. Department of Information Technology- Manufacturing of Smart Dustbin.
2. Department of Chemistry - Preparation of phenyl as floor cleaner.
3. Department of Physics - Development of dual power supply.
4. Department of Botany - Bouque Making from incubation sub centre.
5. Department of Zoology - Prawn pickle flavour of ocean.

As a need of time, this institute is developed Incubation Centre for the aforesaid purpose with the basic background Industrialist, Businessman's are invited to discuss the present status of the job market, what kind of skill is required, actual operation in the commercial sector as like issues are discussed. This will very helpful to student to get a chance to meet investors, get access to quality manpower and experienced advisors (the intangible benefits of an incubation).

Due to the nearby industrial area, it is also good to identify a setoff advisor industry veterans, faculty and investors, which always guides the incubates on strategic issues. Under the incubation centre, experts in the field of industry, banking sectors, journalism, IT field, government sector invited so as to incubate the students for their future field of profession.

All students are taken part in this session by online as well as offline session. In college we organize a various speech to incubate students such as journalism, banking sector, IT industries, in various research field, etc. The college provided infrastructure for incubation center: Space. Connectivity – internet/telephone/electricity. Datacentre. Services – maintenance, Furnishing – chair, table, etc. IT Infra and Support – software, LAN, leased lines, Wi-Fi, printer, scanner, copier.

The institution has organized experts talk and awareness programmes on Indian Knowledge System (IKS) to implement NEP from next academic year.

The institution has created awareness about Intellectual Property Right (IPR) through constituting committee and organized various awareness program.

**One week workshop on Induction program on India Knowledge System**

**REPORT**

One week a workshop on “**Induction program on India Knowledge System**” was jointly organized on dated 12/12/2022 to 15/12/2022. This workshop was conducted offline mode.

**Adv. Anandrao Bhosale, Chairman of this institute**, introduced about importance of Indian knowledge system. Then after, comprehensive message of **Mr. Mangeshbhai Butala, Secretary of Sahajeevan Shikshan Sanstha**, read by **Dr. Amol Patil, Secretary of the workshop** then followed by **Dr. Anita Awati, Convener of the workshop**, introducing all Resource persons **Mr. Sanjay Mathapati, Mr. Suyog Mirgal, Mr. Sanjay kadav, Mrs. Akshata Bhoir** and focus on the themes of the workshop along with the total number of participants, different plenary session and technical sessions.

**Mr. Sanjay Mathapati**, Resource person for the physical health with the help of yoga delivered his offline mode session. And explain student’s what is importance of yoga in day to day life. And they guide students about various yogasanas.

**Mr. Suyog Mirgal**, Resource person for the self-exploration with Ayurveda. He guide students about Aurveda. And give information about aurveda.

**Mr. Sanjay kadav**, Resource person for the Mindfulness meditation. He tell students Meditation is a practice in which an individual uses a technique – such as mindfulness, or focusing the mind on a particular object, thought, or activity – to train attention and awareness, and achieve a mentally clear and emotionally calm and stable state.

**Mrs. Akshata Bhoir**, Resource person for the Suranchi Maifil.

The session ended with the vote of thanks delivered by **Dr. C. R. Salunkhe, Co-Convener of the workshop**.

Respected sir,

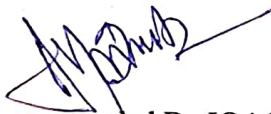

With reference to above mention subject, I am submitting here syllabus of commercial training program on named "Manufacturing of smart dustbin". This course aims to provide students with a creative and hands-on experience by doing actual preparation process to making smart dustbin from small to big scale.

A detail of syllabus is attached here with.

Kindly request to needful to start the said commercial training program in our institute.  
Thanking you

Yours faithfully,  
Head of the department

**Title: MANUFACTURING OF SMART DUSTBIN**  
(Commercial Training Program)

---

**Introduction:**

**Theory:**

In the recent decades, urbanization has increased tremendously. At the same phase there is an increase in waste production. Waste management has been a crucial issue to be considered. This proposal is a way to achieve this good cause. In this project smart dustbin is built on a microcontroller-based platform Arduino Uno board which is interfaced with the Servo motor and ultrasonic sensor. Ultrasonic sensor is placed at the top of the dustbin which will measure the stature of the dustbin.

The threshold stature is set at a particular level. Arduino will be programmed in such a way that when someone will come in front of dustbin the servo motor will come in action and open the lid for the person to put the waste material into the dustbin. Once these smart bins are implemented on a large scale, by replacing our traditional bins present today, waste can be managed efficiently as it avoids unnecessary lumping of wastes on roadside. Foul smell from these rotten wastes that remain untreated for a long time, due to negligence of authorities and carelessness of public may lead to long term problems. Breeding of insects and mosquitoes can create nuisance around promoting unclean environment. This may even cause dreadful diseases.

**Requirement:** Arduino Module, ultrasonic sensor, servo motor, dustbin.

**Syllabus**

**Course Description:** This project-based course focuses on the design, development, and implementation of a smart dustbin. Students will explore various technologies, including sensors, microcontrollers, and wireless communication, to create an intelligent waste management system.

**Week 1-2:** Introduction to Smart Dustbins

Overview of smart dustbins and their importance

Exploration of existing waste management systems

Identification of challenges in traditional waste disposal methods

**Week 3-4:** Sensor Technology

Introduction to different types of sensors (ultrasonic, infrared, weight sensors)

Selection criteria for sensors in a smart dustbin

Hands-on exercises with sensors

**Week 5-6:** Microcontrollers and Hardware Integration

Basics of microcontrollers (Arduino, Raspberry Pi)

Connecting and configuring sensors with microcontrollers

Integration of actuators (servo motors) for lid control

**Week 7-8:** Communication Protocols

Introduction to wireless communication (Bluetooth, Wi-Fi)

Implementing communication between the smart dustbin and a mobile app

Data transfer and security considerations

**Week 9-10:** Power Management

Power requirements for the smart dustbin components

Battery selection and power optimization techniques

Implementing a power-efficient system

**Week 11-12:** Mobile App Development

Basics of mobile app development

# Outcomes of commercial use of manufacturing of smart dustbin

## (Training based program)

- **Skill Development:** Students will get hands-on experience and by doing actual preparation process related to making dustbin from small scale to big scale.
- **Increased Knowledge:** This training based program specially giving a big opportunity to students for developing their normal thinking mentality to business mind. It will helps students to learn something new to use in daily life.
- **Resume Enhancement:** This training not only related to learn dustbin making but it will give you new experience to make their resume more attractive.
- **Confidence Building:** It will helps students to gain more confidence about any commercial training based program to overcome their fear about practical handling.

## Title: MANUFACTURING OF SMART DUSTBIN (Commercial Training Program)

---

### Introduction:

#### Theory:

In the recent decades, urbanization has increased tremendously. At the same phase there is an increase in waste production. Waste management has been a crucial issue to be considered. This proposal is a way to achieve this good cause. In this project smart dustbin is built on a microcontroller-based platform Arduino Uno board which is interfaced with the Servo motor and ultrasonic sensor. Ultrasonic sensor is placed at the top of the dustbin which will measure the stature of the dustbin.

The threshold stature is set at a particular level. Arduino will be programmed in such a way that when someone will come in front of dustbin the servo motor will come in action and open the lid for the person to put the waste material into the dustbin. Once these smart bins are implemented on a large scale, by replacing our traditional bins present today, waste can be managed efficiently as it avoids unnecessary lumping of wastes on roadside. Foul smell from these rotten wastes that remain untreated for a long time, due to negligence of authorities and carelessness of public may lead to long term problems. Breeding of insects and mosquitoes can create nuisance around promoting unclean environment. This may even cause dreadful diseases.

**Requirement:** Arduino Module, ultrasonic sensor, servo motor, dustbin.

**Syllabus**

**Course Description:** This project-based course focuses on the design, development, and implementation of a smart dustbin. Students will explore various technologies, including sensors, microcontrollers, and wireless communication, to create an intelligent waste management system.

**Week 1-2:** Introduction to Smart Dustbins

Overview of smart dustbins and their importance

Exploration of existing waste management systems

Identification of challenges in traditional waste disposal methods

**Week 3-4:** Sensor Technology

Introduction to different types of sensors (ultrasonic, infrared, weight sensors)

Selection criteria for sensors in a smart dustbin

Hands-on exercises with sensors

**Week 5-6:** Microcontrollers and Hardware Integration

Basics of microcontrollers (Arduino, Raspberry Pi)

Connecting and configuring sensors with microcontrollers

Integration of actuators (servo motors) for lid control

**Week 7-8: Communication Protocols**

Introduction to wireless communication (Bluetooth, Wi-Fi)

Implementing communication between the smart dustbin and a mobile app

Data transfer and security considerations

**Week 9-10: Power Management**

Power requirements for the smart dustbin components

Battery selection and power optimization techniques

Implementing a power-efficient system

**Week 11-12: Mobile App Development**

Basics of mobile app development

Design and development of a user interface for the smart dustbin

Integration of app with the smart dustbin via wireless communication

**Week 13-14: Data Analysis and Reporting**

Collecting and analyzing data from the smart dustbin

Implementing reporting features in the mobile app

Data visualization techniques

**Week 15-16: Testing and Debugging**

Conducting thorough testing of the smart dustbin system

Respected Sir/Madam,

With reference to above mention subject, I am submitting here syllabus of commercial training program on named "**Preparation of Phenyl as floor Cleaner.**" This course aims to provide students with a creative and hands-on experience by doing actual preparation process related to making phenyl from small scale to big scale.

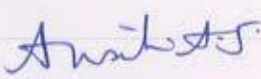

A detail of syllabus is attached here with.

Kindly request to needful to start the said commercial training program in our institute.

Thanking you,

Yours faithfully,

## Title: Preparation of Phenyl as floor Cleaner (Commercial training program)

---

- **Introduction:**

**Theory:** Phenyl is basically used as disinfecting agent. It is made from pine oil. The main role of disinfectant is to kills 99.99% germs and drives away the mosquitoes, cockroaches & tiny insects which are harmful to disturb the Health and Environment.

Basically White Phenyl is very affective in all purpose of Cleaning. This Natural disinfectant used to destroy odour & promote sanitation.

**Requirement:** Pine oil (22%-26%), Alphox 200, Water, TRO (Turkey Red oil).

### **Uses & Benefits:**

- It is used today in combination with other phenolics in various institutional & domestic disinfectant formulation.
- It is used to destroy bad odour & promote sanitation.
- It is used in public places like schools, hotels, stores & offices as a disinfectant.
- It possesses pharmacological properties & it is used as an antioxidant, analgesics, chloretic etc.

- **Process:**

**Aim:** To prepare Phenyl for commercial use.

**Requirement:** Pine oil (22%-26%), Alphox 200, Water, TRO (Turkey Red oil).

**Procedure:**

1. Take 10ml of alphox 200.
2. Mix 10ml of TRO (Turkey Red oil) with alphox 200 solution.
3. Add 20ml of pine oil in the same solution.
4. Add 960ml of water.

We will get final product as a white phenyl. If we want to make different colors of phenyl then add any food color to it. It is affordable & also best product for marketing.

- **Confirmation:** To get Confirmation about successful formation of Phenyl we will check its by following Steps:

- 1) **Visual Inspection:** Check the appearance of the Solution.  
White Phenyl typically has a milky or opaque appearance.
- 2) **pH Test:** pH of White phenyl is typically alkaline(pH= 8-9).
- 3) **Odor:** Sniff the solution white phenyl usually has a characteristics pine or medicinal smell due to pine oil contain.
- 4) **Heating Test:** Observe the solution for any sign of separation or precipitation when subjected to a slight increase in temperature.
- 5) **Emulsification Test:** Put a small amount of solution in water white phenyl should emulsify by forming a stable milky emulsion when mix with water.

- **Packing:**

- 1) **Packaging:** Transfer the white phenyl solution to desired containers. One of the optional available for packaging liquid product bottle and another option for packaging liquid product is pouch.
- 2) **Labeling:** Clearly label the containers with product information, usage instructions and safety precautions.
- 3) **Storage:** Store in a cool, dry place away from direct sunlight.

**Syllabus**

**1. Fundamentals of Electronics** **(10 Hrs.)**

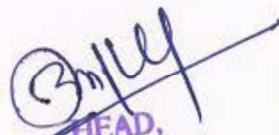

Introduction to Electronics, applications of Electronics Electronic Components: Resistors, Capacitors, Inductors, Relays, Batteries, Switches, cables and connectors, fuses (Only basic concept, working, Specifications and application is expected) Series and parallel combination of resistors, capacitors and inductors.

**2. A.C. Bridges** **(10 Hrs.)**

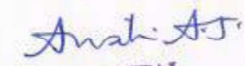

General AC Bridge, Maxwell's Inductance Bridge, Maxwell's L/C Bridge, De Sauty Bridge, Wien Bridge.

**3. Skills** **(20 Hrs)**

- a) To determine the Resistance & Capacitance using Color code / Number & verify using Multimeter (Analog / Digital)
- b) Use of digital multimeter
- c) Testing of components (Resistors, Diode, Transistor, Capacitor)
- d) Shouldering Technique
- e) PCB design

## Summary Report

### Commercial Training Program 2022-23

Department: Physics

Duration: 40 hrs.

#### Learning Outcomes:

1. To understand importance of Electronics in day today life.
2. To understand basics of electronic circuits.
3. To make the students learn through problem solving.
4. To understand few electronic systems.

- **Introduction:**

The 12 V dual power supply have been developed in very low cost and very high efficient output voltage. This device required very small amount of electronic components such as transformer, diodes, capacitors and voltage regulated ICs. It is very high quality and high efficiency of output voltage is about  $\pm 0.1$  V. such devices are mostly useful as a source of various practical conducted for UG and PG level Physics and Electronics laboratory. Actually we clear all the concepts learn from theory and practical during this work such as component detection, shouldering, development of rectification circuit (AC to DC).

**Requirement:** Electronic components, Shouldering gun, Copper clad PCB, etc

**Uses & Benefits:**

We develop 12V dual power supply in our laboratory with very low coasting and very high efficient output ( $\pm 0.1$  V). Such power supply mainly used as a source of various practical conducted for UG and PG level of Physics and Electronics laboratory.

- **Process:**

Connect four diodes as shown in the figure to form a bridge rectifier circuit. The input of this rectifier should be connected to the secondary winding of the transformer while the output is connected to the voltage regulator IC. An input terminal of the voltage through a regulator is connected to the ground through a 2200uf and 100uf capacitor. The output of these voltage regulators is our final output. Each reference terminal is connected to the ground directly.

Working:-

Basically any Power supply consists of four blocks.

1. Transformer
2. Rectifier Circuit
3. Filter Circuit
4. Voltage Regulator.

### Process:

Connect four diodes as shown in the figure to form a bridge rectifier circuit. The input of this rectifier should be connected to the secondary winding of the transformer while the output is connected to the voltage regulator IC. An input terminal of the voltage through a regulator is connected to the ground through a 2200uf and 100uf capacitor. The output of these voltage regulators is our final output. Each reference terminal is connected to the ground directly.

Working:-

Basically any Power supply consists of four blocks.

1. Transformer
2. Rectifier Circuit
3. Filter Circuit
4. Voltage Regulator.

## Title: Prawn Pickle – Flavor of the Ocean

- **Introduction:**

Prawn pickle, when carefully prepared under most hygienic conditions with addition of required quantity of salt, preservatives and spices will have generally an average shelf life of one year. Most of the sea fish like Prawn, Tuna, Pomfret, Mackerel, etc. are ideally suitable for making pickles.

- **MARKET POTENTIAL-** Like vegetable pickles, Prawn pickle has also gained popularity in the recent past. The demand for these types of ready-to-serve fishery products is increasing day by day among the non-vegetarian population in our country. The Defence Purchase Department of the Government of India also requires a sizeable quantity of processed fish products for supplying to the various Departmental Canteens and Officers Mess Establishments. There is a good demand for fish/prawn pickle in foreign countries also
- **Requirement:** Prawn (blanched) 6.250, Salt 1.250, Chilli powder 0.800, Groundnut oil 1.250, Turmeric powder 0.250, Asafoetida 0.250, Garlic 0.500, Mustard powder 0.100, Acetic acid 0.080, Lemon pieces 0.100, Green chilli 0.050, White pepper powder 0.100, Fenugreek 0.025, Ginger 0.200

## Commercial Training Program – Prawn pickle- Flavor of Ocean 2022-23

### Procedure :

- **Blanching** - Fresh prawns are peeled, deveined and washed. They are then blanched in 6% salt solution containing 0.02% citric acid at 100 deg. C for 12 to 15 minutes. These are then drained and cooled.

**Selection and Preparation of Ingredients** - Select fresh garlic, peel and cut longitudinally. Fresh green chillies after removing the stalks are cut longitudinally retaining their seeds. Asafoetida is ground and made into a solution with distilled water or vinegar. Fresh lemons are washed and cut into 8 to 10 pieces of uniform sizes. Fresh ginger after cleaning is cut into small pieces. Fenugreek is fried and powdered. Mixing Heat oil to 180 deg.C. Add mustard and fry for 2 minutes. Garlic, green chilli and lemon pieces are added one after another and are stirred well for 3 minutes. Add salt powder and mix well and heat for 2 minutes. Ginger pieces and asafoetida solution are then added and mixed. Red chilli, white pepper and turmeric powders are added, mixed and heated for 2 minutes. Vinegar is also added immediately. When there is a separation of liquid portion in the heated product by the addition of vinegar, blanched prawns are added slowly and mixed well. Quantity of gravy can be increased by addition of 2 to 3% blanched solution containing salt and citric acid. After heating the product at 100 deg.C for 3 minutes, it is cooled till FISH PICKLE 1 month 66 the temperature comes down to 60 deg.C. Add required quantity of ascorbic acid and sodium benzoate. They are then packed in air tight sterilized bottles.
