Report On Chess Game Played In Annual Sport.

A chess game is the most intelligent game ever invented. It helps one think critically even in day to life: it's referred to as "game of the mind." The game had its roots in India in the 16th century. It has its own rules that have varied since, but others remained. Two people play the chess game on a chessboard that has sixty-four squares. The board has dark and light patterns, the horizontal row is called the files, and vertical rows are called ranks. The game has thirty-two pieces: two kings, two queens, two knights, two rooks, two bishops, and sixteen pawns. The pawns are on the second rank, eight each side, rooks are placed on the outside corner, and knights are placed immediately after the rook.

The queen is at the center in a square of the same color, and king next to the queen (Smirnov 20). The objective of the game is to protect the king from being captured. This paper will take us through how players play their game from arranging the board to winning. In I.C.S COLLEGE chess was played during annual sport dated on **22-November-2021.**
